PELI 1 YEAR LIMITED GUARANTEE

Peli Products S.L.U. ("Peli") guarantees its rotationally moulded products will be free of defects in materials and workmanship for one year from the date of invoice. This warranty does not cover any associated hardware including closure hardware, handles, wheels, and fasteners, which Peli warrants against defects in materials and workmanship for 90 days from the invoice date. This warranty applies only to the original purchaser and is not transferable. To the extent permitted by law, Peli's liability is limited to the case and not its contents and in no event shall Peli's liability to the purchaser for damages exceed the purchase price of the case in respect of which damages are claimed. All warranty claims of any nature are barred if the container has been altered, damaged or in any way physically changed, or subjected to abuse, misuse, negligence or accident.

For complete warranty details, see www.peli.com/WARRANTY

ADVANCED CASE SOLUTIONS FOR AEROSPACE & DEFENSE INDUSTRIES

CUSTOMISED CONTAINERS ENGINEERED TO PERFECTION

+ METAL AND FOAM PROTECTION

Metal decks or cradles are used to secure heavy equipment, and elastomeric shock mounts isolate the metal fixture from the case shell.

Shock absorbing foam is custom fit to your component, and a variety of densities and material compositions are available. Precise kitting of aircraft parts and tools can mitigate foreign object damage (FOD). O-ring gaskets, forklift pockets, pressure relief valves and heavy duty spring loaded handles are other custom options that make a Peli-Hardigg™ case much more than a box. And our best-in-class quality inspection and continuous improvement programs guarantee that the last case is the same high quality as the first.

NEW PELI-HARDIGG™ LIGHT LIFT™ CASES

At 30%* lighter than our traditional heavy-duty roto moulded cases, the Peli-Hardigg™ Light Lift™ series allows for faster deployment and reduced shipping costs, without compromising protection.

SINGLE LID CASE FEATURES

- | | |
|-----------------------------------|----------------------------------|
| A Elastomeric Shock Mounts | G Tie Down RINGS |
| B Velcro Lock Down Straps | H Stainless Steel Latches |
| C Metal Cradle | I Skid Runners |
| D Reinforced Corners | J Purge Valves |
| E Precision Routed Foam | K Strengthening Ribs |
| F Comfort Grip Handles | |

CERTIFICATIONS* AND APPROVALS:

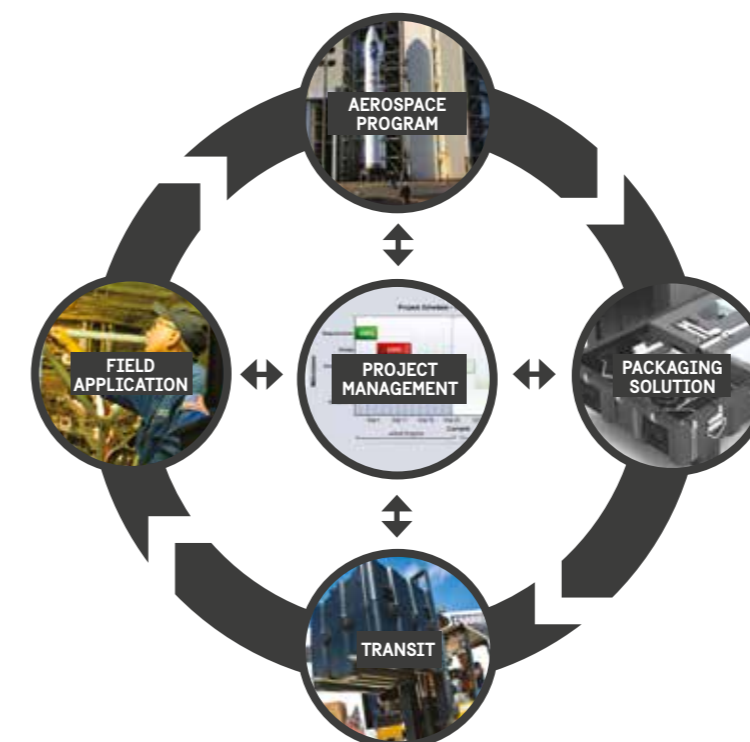

IP67: Water resistance and dust ingress
AIR TRANSPORT ASSOC.: Spec 300 Category 1
MIL-Std 810, Def Stan 81 41 Level J
Test reports available to certify military standards
*actual approvals vary by case design

STATE-OF-THE-ART INTERIOR PROTECTION

Our internal teams have long-term experience in designing everything from simple foam cushions to extremely complex metal structures for use in dramatically diverse shipment, storage, and use conditions – including military deployments and combat situations. From deck-mounted equipment to bezel-mounted electronics with integrated exhaust fans to cases with multiple access points and interface portals or extended-profile customisations – no case requirement is beyond our capabilities.

In extreme temperatures, undergoing radical oscillation or direct impact, surrounded by water, chemicals or fine dust particulates – your product is protected inside our Advanced Case Solution. We control every stage of the process to ensure integrated performance of your part and our protective solution, from interior stabilisation to exterior hardware.

Investing in an Advanced Case Solution ensures your Mission Critical operations will not fail.

Peli's integrated process
flow anticipates your unique
protective packaging requirement

4 STAGE CUSTOM ENGINEERING PROCESS

EVALUATION

- » Product Specifications
- » Customer Performance Needs
- » Product Interface and Access Points
- » Stability, Impact and Drop Requirements
- » Environmental and Field Conditions
- » Vent and Pressure Requirements
- » Mobility and Freight Compliance

DESIGN AND ENGINEERING

- » CAD, 2D Layout and Solid Models
- » G-Force Mapping and Applied Cushioning Curve
- » Tooling Design
- » Equipment Support and Cradle Design
- » Part Isolation and Sway Space Planning
- » Usage and Operation Optimisation
- » Environmental Analysis

PROTOTYPING AND TESTING

- » Shock and Vibration Attenuation
- » Submersion and Rain Resistance
- » Shear Force Testing
- » Dust Particulate Ingress
- » G-Force at Specified Drop Heights
- » Extreme Temperature Tolerances
- » Mil-Spec Testing

MANUFACTURING

- » Warranted Parts and Accessories Engineered to Specifications
- » Integration of Customer Parts and Accessories Per Functional Specifications
- » Quality Control Testing and Inspection
- » On Time Delivery
- » Technical Support

Advanced Case Solutions are the result of a multi-disciplinary, 4-stage process. Working closely with your team, our engineers can customise a protective system according to your product specifications, usage and environmental analysis.

UK, US AND AUSTRALIAN PRODUCTION FACILITIES CLOSE CONNECTION WITH LOCAL MARKETS

Peli-Hardigg's regional custom case facilities, known as Advanced Case Centers, are located in UK, United States (east and west coast) and Canada, and offer a full slate of protective solutions. Services offered include high-end CAD design, metal deck work, g-force-rated shock mount systems, advanced foam cushioning and fabricated frame systems.

Peli-Trimcast custom case solutions are designed and manufactured in Melbourne, Australia and offer additional solutions for international customers.

Our facilities are ISO 9001:2015 certified and our products NATO Codified.

+ PELI-TRIMCAST SOLUTIONS

Peli-Trimcast produces a range of Australian made standard and bespoke engineered packaging solutions for international customers. The solutions can include shock mitigating systems, such as customised interiors of rotomoulded cradles embedded in the case shape or custom foam inserts, ensuring maximum equipment protection during transport, storage and operation, even in the harshest conditions. Custom solutions have been used to house and protect high-tech equipment for the military in Australia and other NATO-aligned military customers around the world.

+ COORDINATED GLOBAL SYSTEM

Peli-Trimcast designs and manufactures standard and custom case solutions in Australia for international customers. Furthermore, we employ the design and production capabilities from Peli facilities across the EMEA region, drawing on our own expertise from more than 60 years of experience within these markets. Our global network of design and manufacturing centres enables Peli-Trimcast to better support customers no matter where their equipment travels to.

+ COMPREHENSIVE TECHNICAL INFRASTRUCTURE

The Peli-Hardigg facilities count on the latest world-class equipment and rotational moulding machinery. Furthermore, our US South Deerfield facility includes a complete metal workshop to produce the majority of the metal parts needed to build our custom solutions.

+ TESTING...1-2-3

Military and OEM customers may need to certify the case will perform to specific requirements. Under precise control conditions our Advanced Case Centers subject our cases to a battery of rigorous lab tests including drop, vibration, leak, heat and dust tests.
